

Department of Artificial Intelligence and Data Science
Curriculum (Courses) and Activities planned for each courses

Subjects	Subject Type	Activities Planned		
		Mandatory	Optional	Remarks
Semester I				
Problem Solving using C	J	30 Practice problems + 15 Final test (Industry specific) - Codethon (Industry specific) - Mini project		Mini project and Codethon are mapped with Assignment 1 and 2 marks Practice and Final test are mapped with Lab internal marks
Web Essentials	J	- Personal Portfolio design - Mini project: Responsive web design		Both activities are mapped with Assignment 1 and 2 marks
Maker Space	L	3D printing design - Build an Electronics project		Both activities are mapped with Assignment 1 and 2 marks
Semester II				
Introduction to Artificial Intelligence	J	- Coursera: Machine Learning with Scikit-learn, PyTorch & Hugging Face - Gate Questions Practice		Both activities are mapped with Assignment 1 and 2 marks
Data Structures using C	J	30 Practice problems + 15 Final test (Industry specific) - Codethon (Industry specific) - Gate Questions Practice	NPTEL – Data Structures and Algorithms	Codethon and Gate Questions Practice are mapped with Assignment 1 and 2 marks Practice and Final test are mapped with Lab internal marks

Digital Principles & Computer Organization	J	• Quiz • Digital Logic Design Challenge – organized by ECE department		Both activities are mapped with Assignment 1 and 2 marks
Foundations of Data Science	J	• 30 Practice problems + 15 Final test (Industry specific) • Codethon (Industry specific) • Mini project		Mini project and Codethon are mapped with Assignment 1 and 2 marks Practice and Final test are mapped with Lab internal marks
ReEngineering for Innovation		• Hardware Project design phase • Project Implementation		Both activities are mapped with Assignment 1 and 2 marks
