

Department of Artificial Intelligence and Data Science
Curriculum (Courses) and Activities planned for each courses

Subjects	Subject Type	Activities Planned		
		Mandatory	Optional	Remarks
Semester V				
Artificial Intelligence on Cloud Computing	J	● Coursera: AWS: Machine Learning & MLOps Foundations ● Internal Hackathon		Both activities are mapped with Assignment 1 and 2 marks
Fundamentals of Parallel Processing	J	● CUDA Toolkit ● Participation in SIH	Fundamentals of Accelerated Computing with CUDA Python NPTEL: Introduction to parallel programming with OpenMP and MPI	Both activities are mapped with Assignment 1 and 2 marks
Web Application Development	R	● Capstone Project: Full-stack with AI Bridge ● External Hackathon		Both activities are mapped with Assignment 1 and 2 marks
Semester VI				
Big Data Analytics	J	● Coursera: Real-Time, Real Fast: Kafka & Spark for Data Engineers Specialization ● Mini Project		Both activities are mapped with Assignment 1 and 2 marks
Time Series Forecasting and Predictive Analysis	J	● Coursera: Microsoft Power BI Data Analyst Professional Certificate ● Internal Hackathon		Both activities are mapped with Assignment 1 and 2 marks
Data Warehousing and Data Mining	R	● Case Study: Designing a Data warehouse solution for real-time application ● External Hackathon	Microsoft Azure Data Fundamentals (DP-900)	Both activities are mapped with Assignment 1 and 2 marks
